PROFILE

Front-End Developer with a passion for coding ready to join a development team. I attended a 300+ hour coding bootcamp to learn new languages and skills. I value collaboration, positive communication, and active listening.

PROJECTS

Weather App

Designer, Developer
2023

- Built a SPA (single-page application) to allow users to search for current and forecasted weather data in any city.
- Used the SheCodes weather API to retrieve weather data.
- Used React States to manage changing data.

Dictionary App

Designer, Developer
2023

- Built a SPA to allow users to search for and find the definition of a word, along with some example sentences, synonyms, and photos.
- Used the SheCodes dictionary API and images API to retrieve data.
- Used React States to manage changing data.

WORK EXPERIENCE

Office Assistant

Denver Audiology, LLC

May 2019 - August 2019

- Fostered rapport with patients to enhance their clinic experience.
- Worked autonomously alongside provider.
- Efficiently managed the front desk by answering the phone, scheduling and confirming appointments, and relaying messages to doctor.
- Digitized and organized calendar and patient data entries and files from previous years.
- Systematized and restructured folders and documents in file cabinets alphabetically and chronologically to fully digitize all patient files.
- Provided technical support.
